WATER SOFTENERS

Advanced soft water  
technology in your home

**Smart, reliable, efficient**

# Trust one of the **World's Largest Manufacturers**

## **eVOLUTION the Next Generation of Water Softeners by EcoWater**

EcoWater is one of the world's leading domestic water softener manufacturers. Its advanced water softening technology and unique smart software provides the ultimate in reliability, efficiency and convenience.

### **Smart Design and Smart Technology**

The eVOLUTION range of water softeners offers a tailored solution to suit any size of home. Our unique smart technology continually adapts to your home and lifestyle based on patterns of water usage. This means the eVOLUTION softener provides the most cost-efficient and long lasting solution to hard water problems.

### **Reliable**

For 90 years EcoWater has been at the forefront of innovation, offering quality products and superior service. Unlike other manufacturers, EcoWater makes everything itself, designing, engineering and manufacturing 95% of our softeners and components in our own ISO9001 quality accredited facilities.

### **Efficient**

eVOLUTION water softeners run at optimal efficiency in terms of both salt and regeneration water use: **up to 50% less running costs per year compared to a basic block salt softener system!**

### **The Very Best Practice**

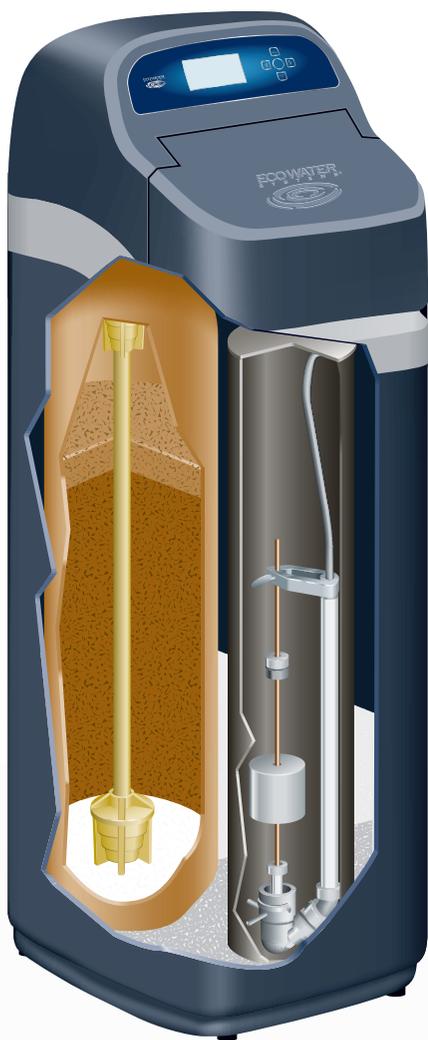

EcoWater believes in long-term customer relationships, and providing everything from tailoring our solutions to your specific needs to providing professional installation and maintenance services.

**Total  
running costs  
are typically just  
£6.50 a month  
for a family  
of four.**

# Designed for every home for better performance

The **eVOLUTION range of Compact, Boost & Power Models** are designed for the modern household. Whatever the size of home, or number of occupants, eVOLUTION provides dramatic savings on salt and water use, adapting all day every day ensuring you always have soft water when you need it.

## Smart

*Intelligent Volumetric Control.*

Your softener is managed by smart software and will adapt itself automatically to optimal settings based on your water consumption.

## Intuitive

*High contrast graphic display with extended display information.*

## High Flow Single Valve

*High flow rates and low pressure drop, with no interruption in water flow.*

## Simple to Use

*Automatic salt level detection and tank light.*

The water softener, using a real time sensor, will automatically indicate when it needs more salt. A light will illuminate the salt tank when opening the lid.

## Reliable

*Minimum moving parts and almost exclusively corrosion free materials to avoid wear and tear.*

- Patented valve with Teflon<sup>®</sup> coated disc.
- Multi-wrap fibreglass reinforced resin tank with 10 year warranty.

## Tablet Salt

*Considerably cheaper than block salt.*

Readily available from a variety of suppliers.

# Use Wi-Fi for your Convenience and Peace of Mind!

The standard Wi-Fi function allows you to connect your eVOLUTION softener to your Wi-Fi network (\*\*) for convenient monitoring and management with your PC, tablet or smartphone from virtually anywhere through the EcoWater Hydrolink Plus® web platform.

## Secured Dashboard

A simple and secure online dashboard provides appliance information at a glance, such as: Number of days until salt tank is empty - Recharge schedule - Water usage.

## Remote Support

If you wish, you can grant remote access to your softener to EcoWater's technical team. This way a first diagnostic can be made without you having to stay at home and support can be provided as needed.

## Customised Alert Messages

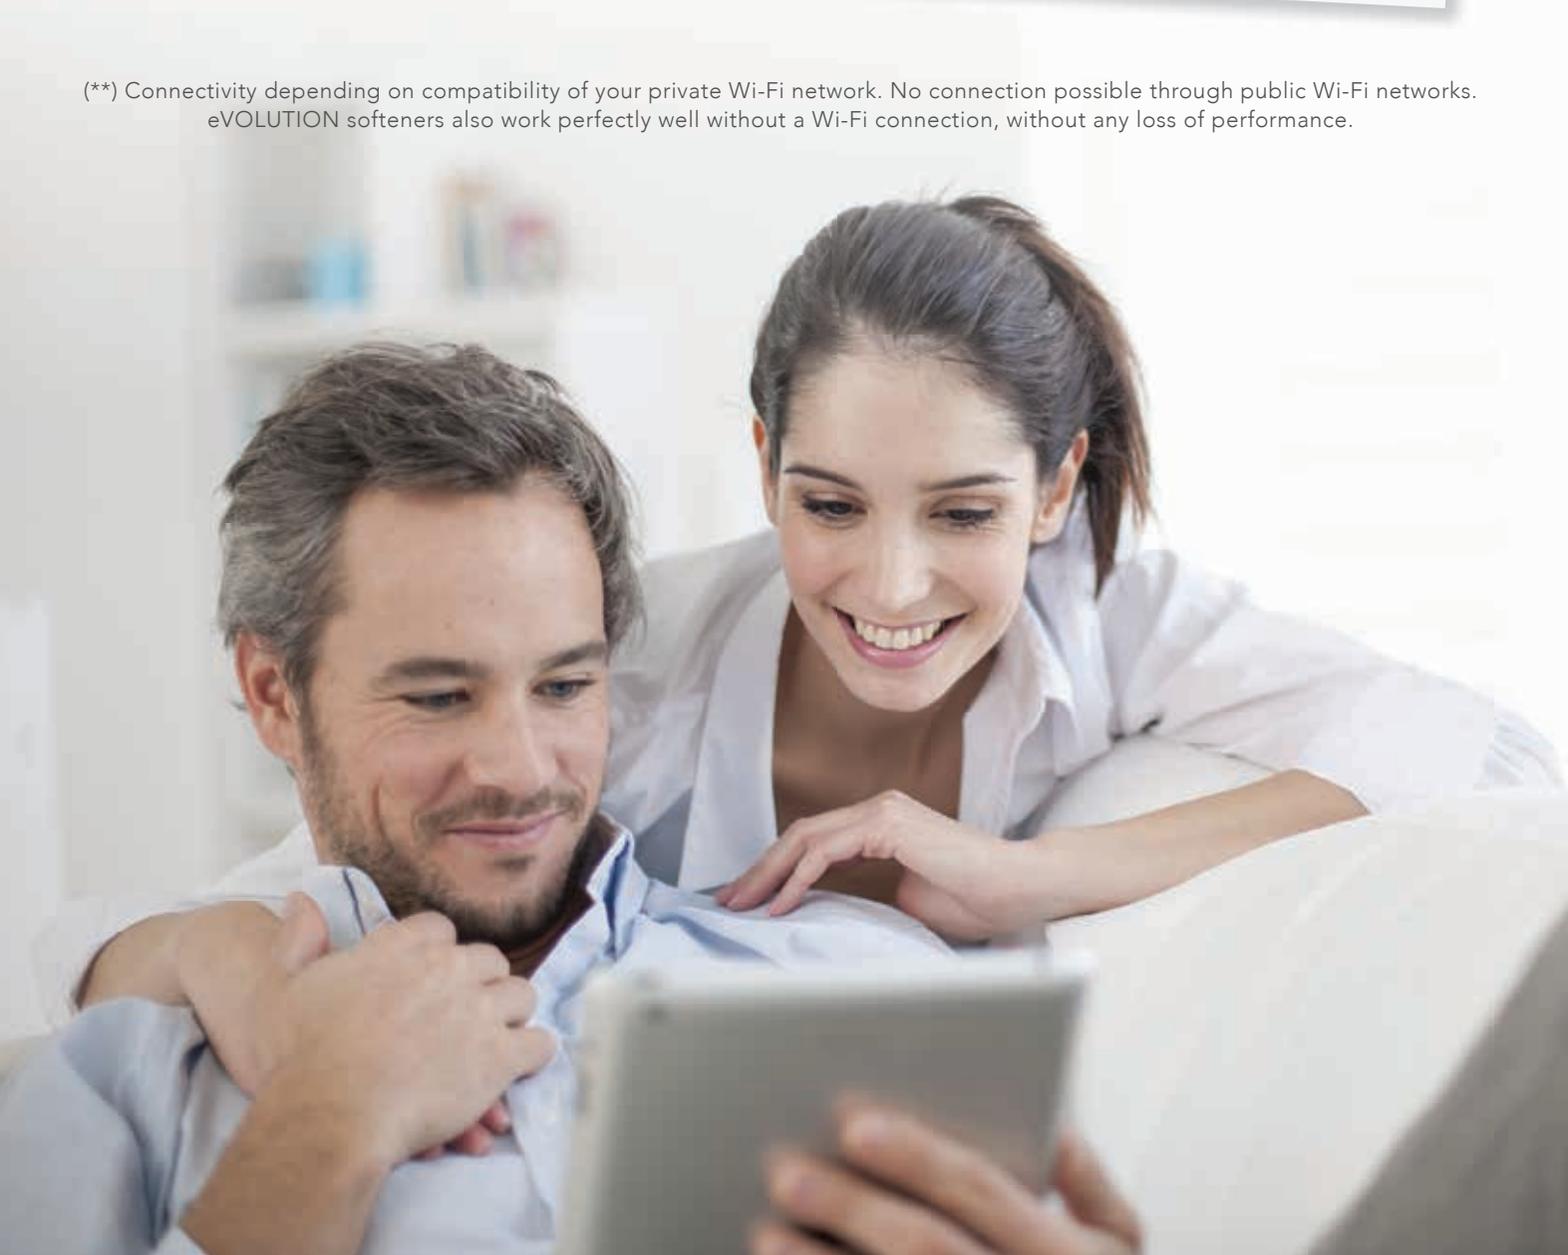

Your softener can warn you via text messages or e-mail (only if you wish!) when the salt level is low or if potential issues are detected, such as continuous water flow above normal usage.

## Remote Management

You can for example remotely launch a regeneration or adjust your alert settings.

(\*\*) Connectivity depending on compatibility of your private Wi-Fi network. No connection possible through public Wi-Fi networks. eVOLUTION softeners also work perfectly well without a Wi-Fi connection, without any loss of performance.

## Why would I need a Water Softener?

Hard water contains an excess of calcium and magnesium minerals. This causes a wide variety of problems such as lime scale deposits, reduction of appliance life-span and efficiency, reduction of soaps and detergents effectiveness and staining on surfaces in the kitchen and bathroom. An eVOLUTION softener resolves these issues by removing the excess calcium and magnesium from the water.

- **Health and Beauty**  
Soaps, shampoos and shower gels create rich lather in water that's soft and gentle on your skin and hair. It is especially beneficial for sensitive skins.
- **Less Energy Consumption**  
By avoiding scale deposits on the heating elements of your boiler, dishwasher, or washing machine, you will prolong the optimal efficiency of your appliances.
- **Softer for your Clothes and Linens**  
As hard water makes your laundry harsh and rough, preserve the brilliance of your coloured fabrics and enjoy brighter and softer whites for longer.
- **Protection of your Plumbing**  
Scale clogs pipes, shower-heads and taps thus reducing water flow and causing pressure drop.
- **Cleaning will be Easier**  
No more scale deposits on your glassware, cutlery, dishes or kitchen and bathroom surfaces.
- **Less Consumption of Detergents**  
Up to 50%\* less detergents, soaps and shampoos for the same result- kinder on the environment too!

\*According to the Battelle Report 2011
